

SKa

EoS Submission Details

EoS name	SKa
category	nuclear
submitted by	Adriana Raduta
affiliation	IFIN-HH, Bucharest-Magurele, POB-MG6, Romania
e-mail contact	araduta@nipne.ro
sheet creation date	September 4, 2015

Abstract

This table corresponds to the zero temperature and β -equilibrium unified EoS by Gulminelli and Raduta [1]. The considered effective interaction is SKa [2]. Cluster energy functionals are those of Ref. [3].

Further References

Nuclear Matter Properties¹

	Quantity	Unit	
n_S	saturation density in symmetric matter	fm^{-3}	0.155
E_0	binding energy per baryon at saturation	MeV	15.99
K	incompressibility	MeV	263.16
K'	skewness	MeV	0
J	symmetry energy	MeV	32.91
L	symmetry energy slope parameter	MeV	74.62
K_{sym}	symmetry incompressibility	MeV	-78.46

Neutron Star Properties¹

	Quantity	Unit	
M_{max}	maximum mass	M_{sun}	2.22
$M_{DU,e}$	mass at DUrca threshold with μ^-	M_{sun}	1.23
$R_{M_{max}}$	radius at maximum NS mass	km	10.82
$R_{1.4}$	radius at 1.4 M_{sun} NS mass	km	12.92

eos.thermo

eos.thermo and the three grid defining files are ComPOSE standard data files and by definition available. eos.thermo does not necessarily provide all possible data.

```
table dimension          1
table type              1
total number of grid points 1238
```

Range and density (#) of the grid parameters:

	Quantity	Unit	min	max	#
T	Temperature	MeV	0.	0	1
n_b	Baryon Nr Density	fm^{-3}	1.E-07	1.853082	1238
Y_q	Charge Fraction		1.373944e-02	4.313053e-01	1

T, n_b , and Y_q are stored in eos.t, eos.nb, and eos.yq, respectively.

¹0-values indicate, that the corresponding data is not provided.

Further Available Data Files

Files and quantities listed in the following are provided beyond CompOSE's core requirements as outlined in Sec.4.2. of the CompOSE manual.

eos.compo : available

index	particle
10	n
11	p
0	e^-
1	μ^-
	- end of table -

further particle sets are defined. One set of quadruples for an unique heavy nucleus, see Table 7.2 of the manual.

Description of Phases

PHASE INDEX #4 : heavy nuclei present

PHASE INDEX #3 : homogeneous matter
