sheet creation date	November 10, 2021

Abstract

This inner crust-core unified EoS for β -equilibrium matter at zero temperature is constructed with a BPS outer crust [1] below $n_B = 2 \times 10^{-3} \text{ fm}^{-3}$, an inner crust EoS [2], including nonspherical pasta phases, calculated within a self-consistent Thomas-Fermi approach [2], and a homogeneous $npe\mu$ core EoS, above $n_B = 0.82 \times 10^{-1} \text{ fm}^{-3}$. The EoS parameterisation used was the non-linear RMF NL3 $\omega\rho$ model with a slope of the symmetry energy, L , equal to 55 MeV [3,4].

Nuclear Matter Properties¹

	Quantity	Unit	
n_S	saturation density in symmetric matter	fm^{-3}	0.148
E_0	binding energy per baryon at saturation	MeV	-16.24
K	incompressibility	MeV	270
K'	skewness	MeV	198
J	symmetry energy	MeV	31.7
L	symmetry energy slope parameter	MeV	55
K_{sym}	symmetry incompressibility	MeV	-8

Neutron Star Properties¹

	Quantity	Unit	
M_{max}	maximum mass	M_{sun}	2.752
$M_{DU,e}$	mass at DUrca threshold (1/9) w/o μ^-	M_{sun}	0
$R_{M_{max}}$	radius at maximum NS mass	km	13.02
$R_{1.4}$	radius at 1.4 M_{sun} NS mass	km	13.76
$\tilde{\Lambda}$	tidal deformability for GW170817 at a mass ratio of $q = 0.8$	-	1050.84

eos.thermo

eos.thermo and the three grid defining files are CompOSE standard data files and by definition available. In eos.thermo, an extra quantity is added (last column). It refers to the geometry of the correspondent pasta phase, represented by an integer, with 0 for the outer crust, and 1 - droplets, 2 - rods, 3 - slabs, 4- tubes, 5- bubbles, and 6 corresponds to the core (homogeneous matter).

table dimension 1
table type 1
total number of grid points 279

Range and density (#) of the grid parameters:

	Quantity	Unit	min	max	#
T	Temperature	MeV	0	0	1
n_b	Baryon Nr Density	fm^{-3}	0.6295×10^{-11}	3.1261	279
Y_q	Charge Fraction		0	0	1

T, n_b , and Y_q are stored in eos.t, eos.nb, and eos.yq, respectively.

¹0-values indicate that the corresponding data is not provided.

Further Available Data Files

Files and quantities listed in the following are provided beyond CompOSE's core requirements as outlined in Sec.4.2. of the CompOSE manual.

eos.mr : This file provides the gravitational mass (in solar masses), the radius (in km), and the tidal deformability of a family of stars computed for this unified inner-crust-core RMF EoS model, with the BPS outer crust.

eos.compo : not available

eos.micro : not available
